

Detergent Chlorine Sanitiser Tablets (1.67g NaDCC)

Cleanline® Detergent Chlorine Sanitiser Tablets are a fast-dissolving dual-action effervescent chlorination tablet combined with an anionic detergent for one-stage surface cleaning and disinfection.

- Dual-action cleaning and disinfection tablet that produces a free available chlorine solution forming predominantly HOCl (Hypochlorous acid).
- Broad spectrum of biocidal activity certified to Certified to EN 1276, EN 13697, EN 13704, EN 1650, EN 17126 (C.difficile spores), EN 14476 (Coronavirus), and EN 16777 (Norovirus).
- Convenient and easy to use and quickly dissolves in water.
- Chlorine tablets provide an easy to use dilution system that eradicates the over-dosing and more importantly minimises any under-dosing potential.
- Easy to store and distribute, no risk of spillages or leaks.
- Accurate dosage, always yielding the stated level of available chlorine. Each tablet gives 1,000 ppm (parts per million) available chlorine per litre of water.

RECOMMENDED DILUTION: Dilute according to required available chlorine for the task.

NUMBER OF TABLETS	AVAILABLE CHLORINE:	APPLICATION EXAMPLE
1 tablet per 100ml (10 tablets in 1 litre)	10,000 ppm	Infectious blood spillages allow at least 3 minutes contact time.
2 tablets per 1 litre	2,000 ppm	Virucidal activity certified to EN 16777 (Adenovirus and Murine norovirus), allow 5 minutes contact time. Sporocidal activity certified to EN 17126 (C.difficile), allow 5 minutes contact time.
1 tablet per 1 litre	1,000 ppm	Broad spectrum environmental disinfection allow 5 minutes contact time. Sporocidal activity certified to EN 17126 (C.difficile), 10 minutes contact time. EN 13704 (Bacteria), 15 minutes contact time.
1 tablet per 2 litres	500 ppm	General surface disinfection. Virucidal activity certified to EN 14476 (Feline coronavirus and Norovirus), 5 minutes contact time. Bactericidal activity certified to EN 1276 and EN 13697, 5 minutes contact time. Fungicidal/yeastocidal activity certified to EN 1650, 15 minutes contact time.
1 tablet per 5 litres	200 ppm	General use on non-porous hard surfaces including floors, walls, tiles. Bactericidal activity certified to EN 1276, 10 minutes contact time.

2 litre chlorine solution dilution Bottle

CODE AND CASE SIZE:

- CL1080 - 200 Tablets (case of 6 tubs)
- CL9020 - 2 Litre Dilution Bottle

PRODUCT INFORMATION:

Appearance: White flat bevelled tablet
 Odour: Characteristic odour
 Oxidising: Non-oxidising (by EC criteria)
 Solubility: Soluble
 Viscosity: Not applicable
 pH for 1 tablet per litre of water: 5.0 - 6.0

QUALITY ASSURANCE:

This product is manufactured in the UK for Bunzl UK & Ireland.

ENVIRONMENTAL:

All surfactants used in Cleanline products comply with the current European regulations concerning biodegradability & protection of the environment.

SAFE HANDLING:

Always wear the correct Personal Protective Equipment (PPE) when handling, dispensing or using chemicals (liquids tablets and powders). All PPE should comply with appropriate standards and be readily available for use.

In case of an accident please refer to the product Safety Data Sheet (SDS) for immediate first aid measures and helpline telephone number for a medical emergency.

SAFE STORAGE:

Store sealed in original container in a cool, well ventilated area away from direct sunlight and extremes of temperature.

ENSURE YOU ARE WEARING RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT (PPE) AND HAVE THE CORRECT EQUIPMENT FOR THIS TASK.

DIRECTIONS FOR USE:

Broad-spectrum environmental disinfection (high risk areas) Dissolve 1 tablet in 1 litre of water, preferably warm (40°C) to provide 1,000 ppm of available Chlorine solution. Warm water speeds up the tablet dissolution time. Clean the surface and remove all visible dirt and gross contamination from surface. Re-apply the Chlorine solution to the surface/equipment and allow at least 5 minutes contact time, see table for detailed antimicrobial performance. Surface must remain wet for the entire contact time. Rinse thoroughly with clean water. Allow to air dry.

General hard surfaces, floors and wall disinfection: Dissolve 1 tablet in to 5 litres of water, preferably warm (40°C) to provide 200 ppm of available Chlorine solution. Clean surface and remove all visible dirt and gross contamination from the surface. Re-apply the solution to the surface/equipment and leave for 10 minutes. Surface must remain wet for the entire contact time. Rinse thoroughly with clean water. Allow to air dry.

IMPORTANT: KEEP SOLUTION AWAY FROM DIRECT SUNLIGHT AND HEAT SOURCES.

IMPORTANT: ALWAYS MIX A FRESH SOLUTION EVERY 24 HOURS

WARNING: DO NOT USE/MIX TOGETHER WITH OTHER CLEANING PRODUCTS. MAY RELEASE DANGEROUS GASES (CHLORINE).

TIP: WARM WATER (BODY TEMPERATURE) WILL HELP SPEED UP THE TABLET DISSOLUTION TIME.
