

# ECO CYCLED RECYCLED PET SWEEPING BROOMS

Made from 100% recycled plastic. One brush contains between 375 and 875 grams of ocean bound plastic waste – that's the equivalent of 15 to 35 bottles that would otherwise pollute the environment.

The Ecocycled brush isn't just stronger and capable of higher performance, but also more sustainable than your typical brush. Alongside each product we've indicated the typical number of recycled plastic bottles used in production.

For every brush we sell, the manufacturer also donates a percentage to Go Forest

## CODE ECO PET+size 100% Recycled PET Medium Broom
